

MEDICINE BALL

Football Muti by Robin Goode, Matteo Bottanelli, Kabir Javier (Jacana, R189.95)

THE BEAUTIFUL pictures in this book give a whole new

understanding of how much soccer means to Africa.

It features children from across the continent kicking tattered old soccer balls with battered boots or their bare feet.

Robin Goode captures a game

not seen under stadium floodlights.

Coming as it does now, it's bound to be a real goal scorer, especially as The Muti Project raises money to supply children's charities with medicine.
